

# Fuel Surcharge 2009

In the past years the price of fuel has fluctuated at the pump for a number of reasons. Fuel is one of the ingredients which effects the level of service that we supply. Many transportation companies adjust their rates daily because of fuel costs. Your base investment includes fuel up to 1.45 per gallon retail average regular gasoline price for the GULF COAST at the pump. If the price increases above this amount the fuel surcharge below will apply.
